Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the examiner has considered applicants' amendment filed February 26, 2007 and the arguments therein. Applicants' arguments prompted the examiner to reconsider what is taught in the references relied upon for the rejection(s) of record, and to other references illustrative of what was known in the art at the time the present invention was made. Upon reconsideration of the reference teachings, the examiner has found that the preponderance of prior art teachings employ significantly higher reaction temperatures for carbonylating olefins having 3 or more carbon atoms, i.e., temperatures from 80 to over 100° C. As such, the examiner concedes that a person having ordinary skill in the art, given the teaching the of references used for the rejection of record, and what is known in the art, would not have been motivated to employ the low reaction temperature required by the instant claims, for carbonylating olefins having 3 or more carbon atoms. Accordingly, the examiner has withdrawn the rejection(s) of record; the instant claims are now allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sikarl A. Witherspoon whose telephone number is 571-272-0649. The examiner can normally be reached on M-F 8:30-6:30.
